

SCRUM Meeting 2 for PC Parlor

Prepared by: John Nolen

Meeting Date: 4/1/2022

Meeting Attendees

- John Nolen
- Jacob Poland
- Gage Broberg
- Alex Nelson

Meeting Agenda Items

- Problems with Amazon API
- Frontend/backend framework
- Updates on planned APIs
- Work on first prototype

Status Update Since Last Meeting

Accomplishments:

- Hosted example Node.js website on Heroku
- Hosted PostgreSQL database on Heroku

Tasks:

Task Description	Assigned to	Completed? (yes/no)
Host website on Heroku	Jacob	Yes
Host database on Heroku	John	Yes
Take notes on Facebook API	Alex	No
Take notes on Amazon API	Gage	Yes

Before The Next Meeting

Plans:

- Add basic functions to website (pages, database interaction)
- Parse/clean data to populate database
- Generate keys for APIs

Task Assignments:

Task Description	Assigned to
Basic website functionality (add pages, database interaction)	Gage
Parse/clean data from UserBenchmark	John
Populate database with UserBenchmark data	John
Take notes on eBay API and generate eBay API keys	Jacob
Continue work with Facebook API; Generate API keys	Alex

Minutes from Previous Meeting

The basic design for the project and its underlying technologies was further clarified. A design for the database was created and the website design was further refined. Heroku was chosen to host the project for its frontend and backend support. The APIs chosen to integrate into the project were divided among team members to research and familiarize themselves with. Steps for going forward and defining roles and responsibilities for team members for sprint 1 were discussed.
